FOR IMMEDIATE RELEASE

ENow Releases Mailscape Feature Pack 2 for Exchange and Mobile Device Management

[Los Angeles, Thursday, 22 July 2010]

[ENow](#), a Microsoft Gold Certified Partner specializing in infrastructure consulting and the development of software to simplify systems management, today released Feature Pack 2 for their [award-winning](#) Exchange and Mobile Device Management solution, Mailscape. The new version helps companies ensure a smooth migration to Microsoft Exchange Server 2010, streamlines daily IT tasks associated with e-mail system administration, and provides over 40 new reports, including mobile device usage.

Microsoft's latest messaging platform delivers simpler high availability and disaster recovery solutions and provides faster and easier ways for users to communicate so that businesses can realize productivity gains; however, the migration process can be costly and time-consuming.

Mailscape's reporting module provides administrators with key statistics to help them plan their migration, clean up their environment, validate that new servers were configured correctly, and build migration batches. [Mailscape's](#) One Look dashboard provides a graphical overview of the entire messaging system, enabling both the Exchange team and help desk to reduce problem-diagnosis and resolution times. New reports allow management to reduce IT operational costs and ensure Service Level Agreements are being met. Lastly, a new monitoring feature sends a round-trip e-mail from inside the organization to a third-party account to test that external communications are delivered successfully and in a timely fashion.

"The design goals behind the latest version of Mailscape were strategically aligned with the challenges organizations face today," commented Jay Paul Gundotra, Principal Architect of ENow. "Transitioning to a new messaging platform is an inherently risky process. Mailscape reduces the risk of data loss and service interruption by monitoring both the source and target systems, ensuring a successful upgrade. Another big challenge for companies is dealing with the ever-increasing number of mobile devices they must support. These devices pose a security

threat if not properly managed. Our new mobile reports make it easier to keep track of what types of devices are connected to your network.”

About ENow Inc

ENow is a Microsoft Gold Certified Partner specializing in Microsoft infrastructure consulting and the development of software to simplify systems management. Our company’s flagship product is an award-winning utility called Mailscape that provides administrators with a ‘one-look dashboard view’ of the entire Exchange environment. On the consulting side, we are experts at delivering Microsoft Active Directory® and Microsoft Exchange Server® solutions.
